

FNB SALES

Project planning

Phase 1: Data Foundati on Week 1	Import and validate sales dataset	Data quality checks: missing values, outliers, date continuity	Calculated fields: daily price & cost per unit	Calculated fields: daily gross profit & % GP	Calculated fields: daily % GP per unit	Deliverable: Clean dataset with all base metrics
Phase 2: Core Metrics Analysis Week 1-2	Calculate avg unit sales price for full period	Build time-series views of pricing trends	Analyze gross profit patterns and variability	Flag pricing anomalies or unusual trading days		Deliverable: Metrics summary report
Phase 3: Promotional Analysis Week 2-3	Detect promo periods (price drops with volume spikes)	Select 3 distinct periods for deep-dive	Compute Price Elasticity of Demand per period	Compare promotional vs regular trading	Assess effectiveness: volume lift vs margin impact	Deliverable: Promotion performance analysis with recommendation
Phase 4: Advanced Insights Week 3-4	Explore seasonality and day-of-week trends	Evaluate volume vs margin trade-offs	Identify optimal pricing windows	Analyze sales velocity patterns	Revenue concentration analysis	Deliverable: Insights deck with visuals
Phase 5: Visualization & Reporting Week 4	Build executive dashboard with KPIs	Create pricing trend charts	Visualize promotion impact	Construct gross profit waterfall	Volume-price scatter analysis	Deliverable: Interactive dashboard + final report
